

Who gets a say before launch

Year 12 student investigation

Who can challenge this pilot and change its scope?

Hypothesis and criterion

Name the expected effect, the measurement and what would count against your explanation.

Method and reproducibility

Record cases, source, units, parameters, controls and how cases are split.

Paired evidence

Case and split	Baseline	Changed result	Interpretation

Counterexample and revised design

Negotiate using the supplied stakeholder briefs. Record dissent, a revised scope, appeal, owner and stop conditions.

Individual defence

Explain one exact result, the mechanism, your limitation and what would overturn your claim.

Handover and tool use

Next test, saved project filename, tools used and which work is your own.

Use fictional data. Download your project before changing devices. On shared devices, turn remembering off and clear your work when finished.
