

A rover that waits for evidence

Year 3 student investigation

How much evidence should the rover wait for?

My prediction

I think this will happen because

Two fair tests

What I changed	What I kept	What happened

My new case

Write a wait rule. Test an isolated false reading and a real object that lasts for several readings.

Explain and question

My evidence supports this claim. A case that could change my mind is

Use fictional data. Download your project before changing devices. On shared devices, turn remembering off and clear your work when finished.
