

A reef with two stories

Year 4 student investigation

Whose examples shaped the reef classifier?

My prediction

I think this will happen because

Two fair tests

What I changed	What I kept	What happened

My new case

Build equal-sized collections with different group coverage. Test the same new creature on both.

Explain and question

My evidence supports this claim. A case that could change my mind is

Use fictional data. Download your project before changing devices. On shared devices, turn remembering off and clear your work when finished.
