

Yesterdays lagoon today's light

Year 4 student investigation

Will yesterday's rule still work in today's light?

My prediction

I think this will happen because

Two fair tests

What I changed	What I kept	What happened

My new case

Design a light-shift test and separate changing the sensor environment from changing the rule.

Explain and question

My evidence supports this claim. A case that could change my mind is

Use fictional data. Download your project before changing devices. On shared devices, turn remembering off and clear your work when finished.
